

Installation Instructions
for
Bumper Extensions and Screw Clevis Plates
for use with
NightCrawler™ Modular Bumpers

Thank you for purchasing your new Skid Row Offroad Bumper Extensions and Screw Clevis Plates for your NightCrawler™ Modular bumper. They are designed to give you peace of mind while traversing even the toughest trails.

Your package should come complete with the following parts:

- 1. (1) Bumper Extension, Left Front, Right Rear
2. (1) Bumper Extension, Right Front Left Rear
3. (2) Screw Clevis Plates
4. (8) 1/2-13 x 2.5" Hex Head Bolt
5. (8) 1/2-13 Hex Nut
6. (8) 1/2" Lock Washer
7. (16) 1/2" Flat Washer
8. (2) 2" Round Clear Lamp
9. (2) 2" Grommet
10. (2) Wiring Plug for 2" Lamp

Step 1: The bumper does not need to be removed to install the bumper extensions and screw clevis plates, although it may be easier if the bumper is removed.

Step 2: Install each bumper extension and screw clevis plate using four of the 1/2-13x2.5 hex head bolts provided. Place a flat washer under the head of each bolt and then install a flat washer, lock washer, and hex nut on each bolt. You may find it easier to install the bolts from the extension side and then sliding them through the sides of the bumper.

Step 3: Torque the mounting bolts to 80 ft-lbs (108 N-m) once everything is fit together and you're done.

Installation Notes:

- 1. We do not have a wiring kit for the Spotter's Lamps™ that are included with the extensions.
2. The Spotter's Lamps™ should not be wired to your headlight circuit as they are for offroad use only.

We hope you enjoy your new Skid Row Offroad NightCrawler™ Modular bumper extensions and screw clevis plates!

Sincerely,

The Staff at SFK Manufacturing, LLC
